BÜSCHE®
Made in Germany

BÜSCHE®
Made in Germany

For generations, the name **BÜSCHE** has been synonymous with tradition and innovation. Since our founding in 1872, we have remained committed to quality, sustainability, and modern manufacturing processes. Our goal is to develop and produce premium products "**Made in Germany**" – with a clear dedication to our location in Neuenrade.

We manufacture according to strict environmental standards and using the latest technology. Through energy-efficient production processes and responsible use of resources, we make an active contribution to environmental protection. At the same time, we ensure the highest quality and long-lasting durability of our products – in line with the values of German craftsmanship.

As a reliable partner, we stand for excellent quality, a spirit of innovation, and a sustainable future – worldwide.

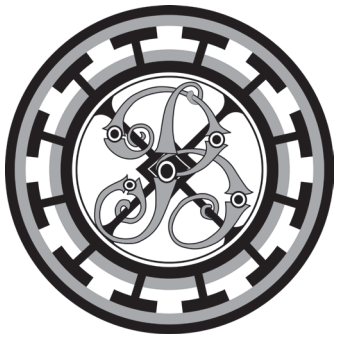

Thank you for placing your trust in the **BÜSCHE** brand. We wish you great success with our products!

Fernando Sanchez Antonio Mazziotti

MADE IN GERMANY

OVER 150 YEARS OF EXPERIENCE AND PASSION

All BÜSCHE curtain sets are made exclusively from the highest-quality raw materials. Ongoing quality checks and perfectly coordinated production processes ensure premium quality – proudly Made in Germany. **With great care and dedication**, our team still crafts many of our products by hand, which has played a key role in the success of the BÜSCHE brand. Thanks to the experience and expertise passed down through generations, BÜSCHE has been delivering exceptional products for over 150 years.

EXCELLENT BRANDING

A STRONG BRAND – READY FOR THE FUTURE

We've taken big steps to strengthen our brand presence and become an even more reliable partner for our customers. Our efforts have been recognized by the German Brand Awards, where we were honored as a WINNER in the category Excellent Brands – Interior & Living, and received a SPECIAL MENTION in the category Excellent Brands – Product Brand of the Year. These awards show us we're **on the right path with our brand development**.

OUR RESPONSIBILITY

CLIMATE-CONSCIOUS MANUFACTURING TO THE HIGHEST ENVIRONMENTAL STANDARDS

We take our responsibility as a manufacturer seriously – toward our employees, our partners, and the environment. That's why we only use top-quality materials sourced from certified partners in Germany, and we strictly comply with the latest EU environmental standards. A special highlight: we use low-carbon aluminum, produced with renewable energy such as wind and hydropower instead of fossil fuels. This allows us to offer **cleaner aluminum with a reduced carbon footprint** in our products.

Other examples of our ecological commitment include **CO^2-optimized manufacturing processes**, heat recovery systems, increasing use of lead-free brass, and minimalist, eco-friendly packaging.

_ Premium materials from German partners
_ Low-carbon aluminum
_ CO^2-reducing manufacturing in Germany
_ Heat recovery systems
_ Strict compliance with EU environmental standards
_ Reduced material and packaging usage
_ Optimized production processes
_ Durable, recyclable products
_ Ongoing investment in eco-friendly manufacturing

THE PRODUCT PORTFOLIO

UNIQUE, DIVERSE, AND BROADLY POSITIONED

With its three product lines – **VION, INSIDE, and TECDOR** – BÜSCHE offers a range that leaves nothing to be desired. **From entry-level solutions and timeless classics to award-winning designer pieces**, BÜSCHE offers made to measure decorations, differing in design, finishes, materials, and pricing.

Thanks to our revolutionary **Motor Technology 2.0**, many of our products can now be motorized **without requiring extra wall or ceiling mounting**. The slot for the motor pulley is now directly milled into the profile, unlocking new design possibilities and making the **motorized BÜSCHE collection** one of the largest worldwide.

VION INSIDE TECDOR

THE TECDOR SERIES

PURE, AESTHETIC, AND INNOVATIVE

When it comes to creating something truly unique, achieving absolute perfection, and standing out in a crowded market, TECDOR is the answer.

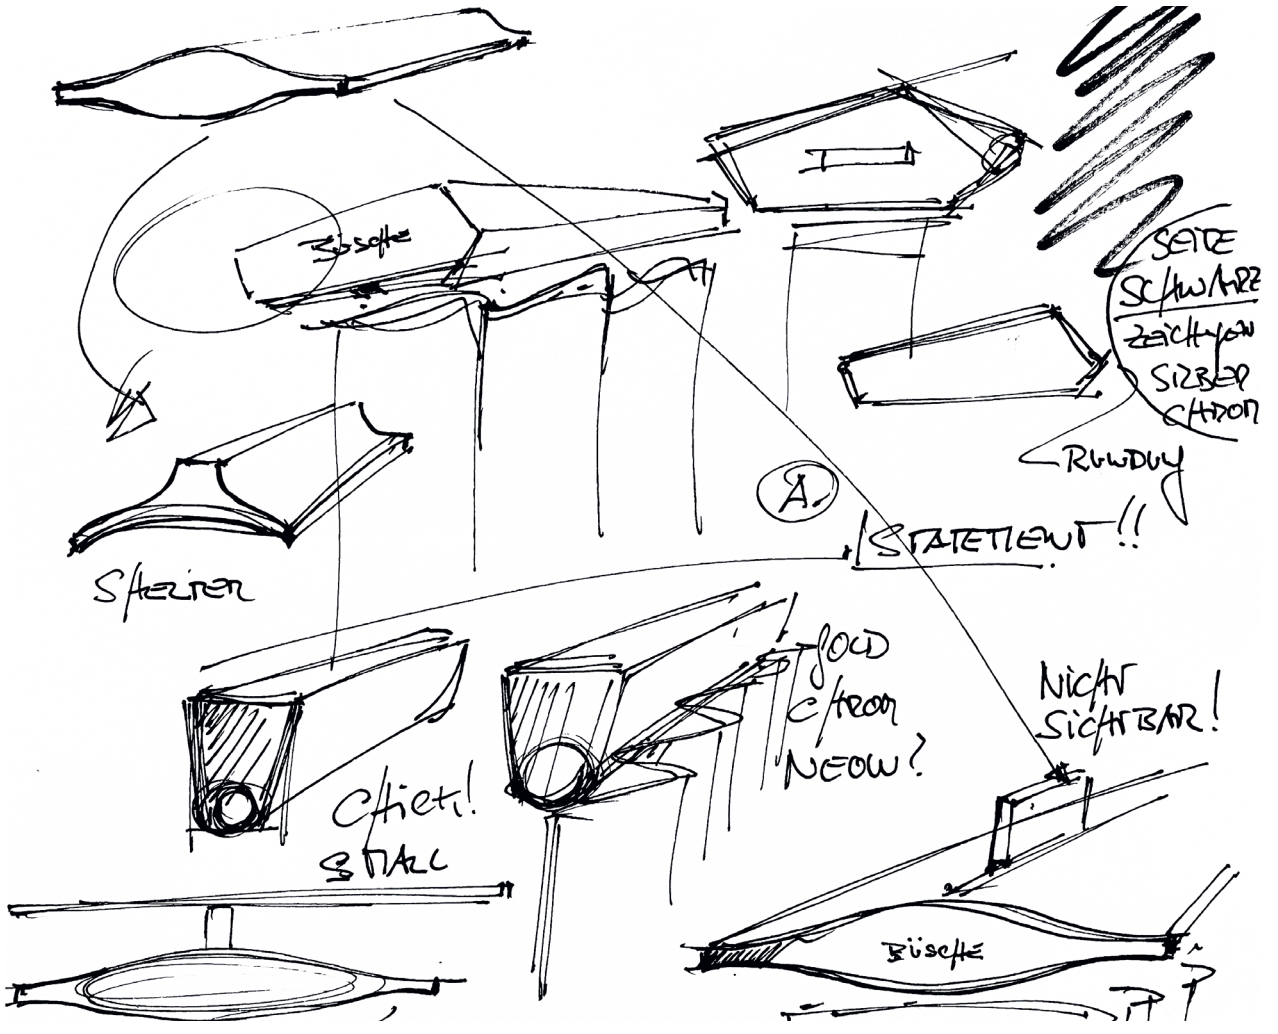

Featuring designs like **PUR, COS, LEP, NEXUS, COLAR, BOW**, and **CALA**, the series was developed **in collaboration with Team Schmiddem** and has already received multiple design awards*.

These design highlights are only possible through a combination of **state-of-the-art manufacturing technology, precision craftsmanship, and passionate handwork** – making imitations nearly impossible.

TECDOR products are bold and distinctive, incomparable to standard solutions in terms of innovation, design language, and function. The minimalist designs and exclusive finishes offer room for highly individual interior styling at the highest level.

Jochen Schmiddem, Team Schmiddem

WHAT INTRIGUED ME WAS THE CONSTANT QUESTION: 'HOW FAR CAN WE GO?'

THE ORIGINAL FROM THE SAUERLAND REGION

BY THE GLOBAL MARKET LEADER FROM SOUTH WESTPHALIA/GERMANY

For 150 years, we've been giving it our all. We've stayed true to **our roots in Neuenrade** and have earned global recognition for our high-quality curtain systems. We continue to set industry standards – for example, we were the first to place the motor behind the glider channel in motorized profiles. Through constant optimization and outstanding quality, **BÜSCHE has become a global market leader from South Westphalia/Germany** – a status **now officially recognized by the SIHK Chamber of Industry and Commerce in Hagen/Germany**.

SIMPLE & INTUITIVE CONFIGURATION

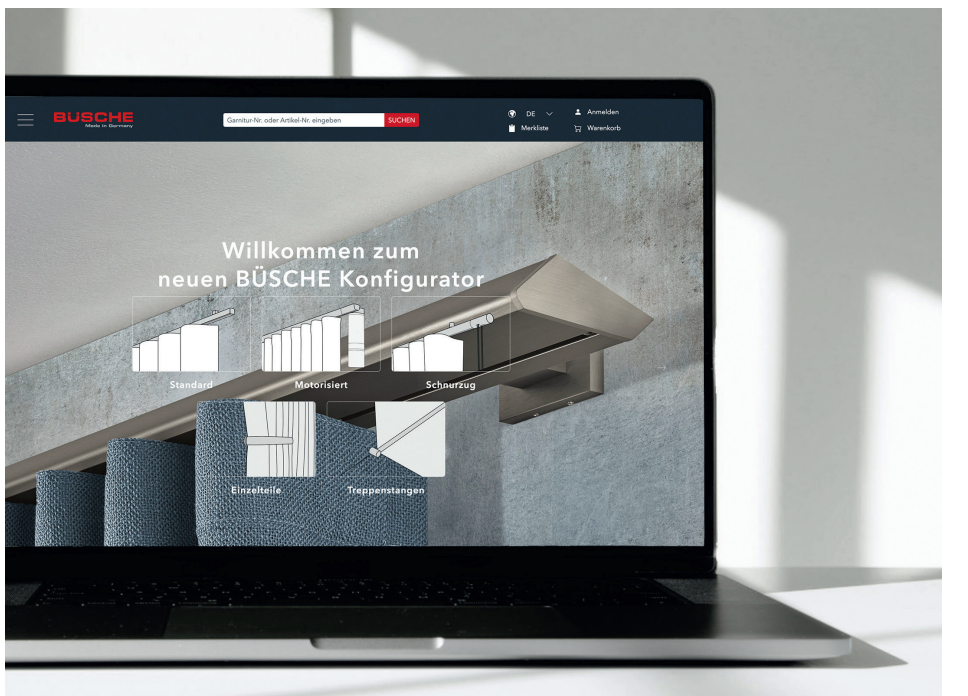

YOUR PERFECT CURTAIN SYSTEM – JUST A FEW CLICKS AWAY

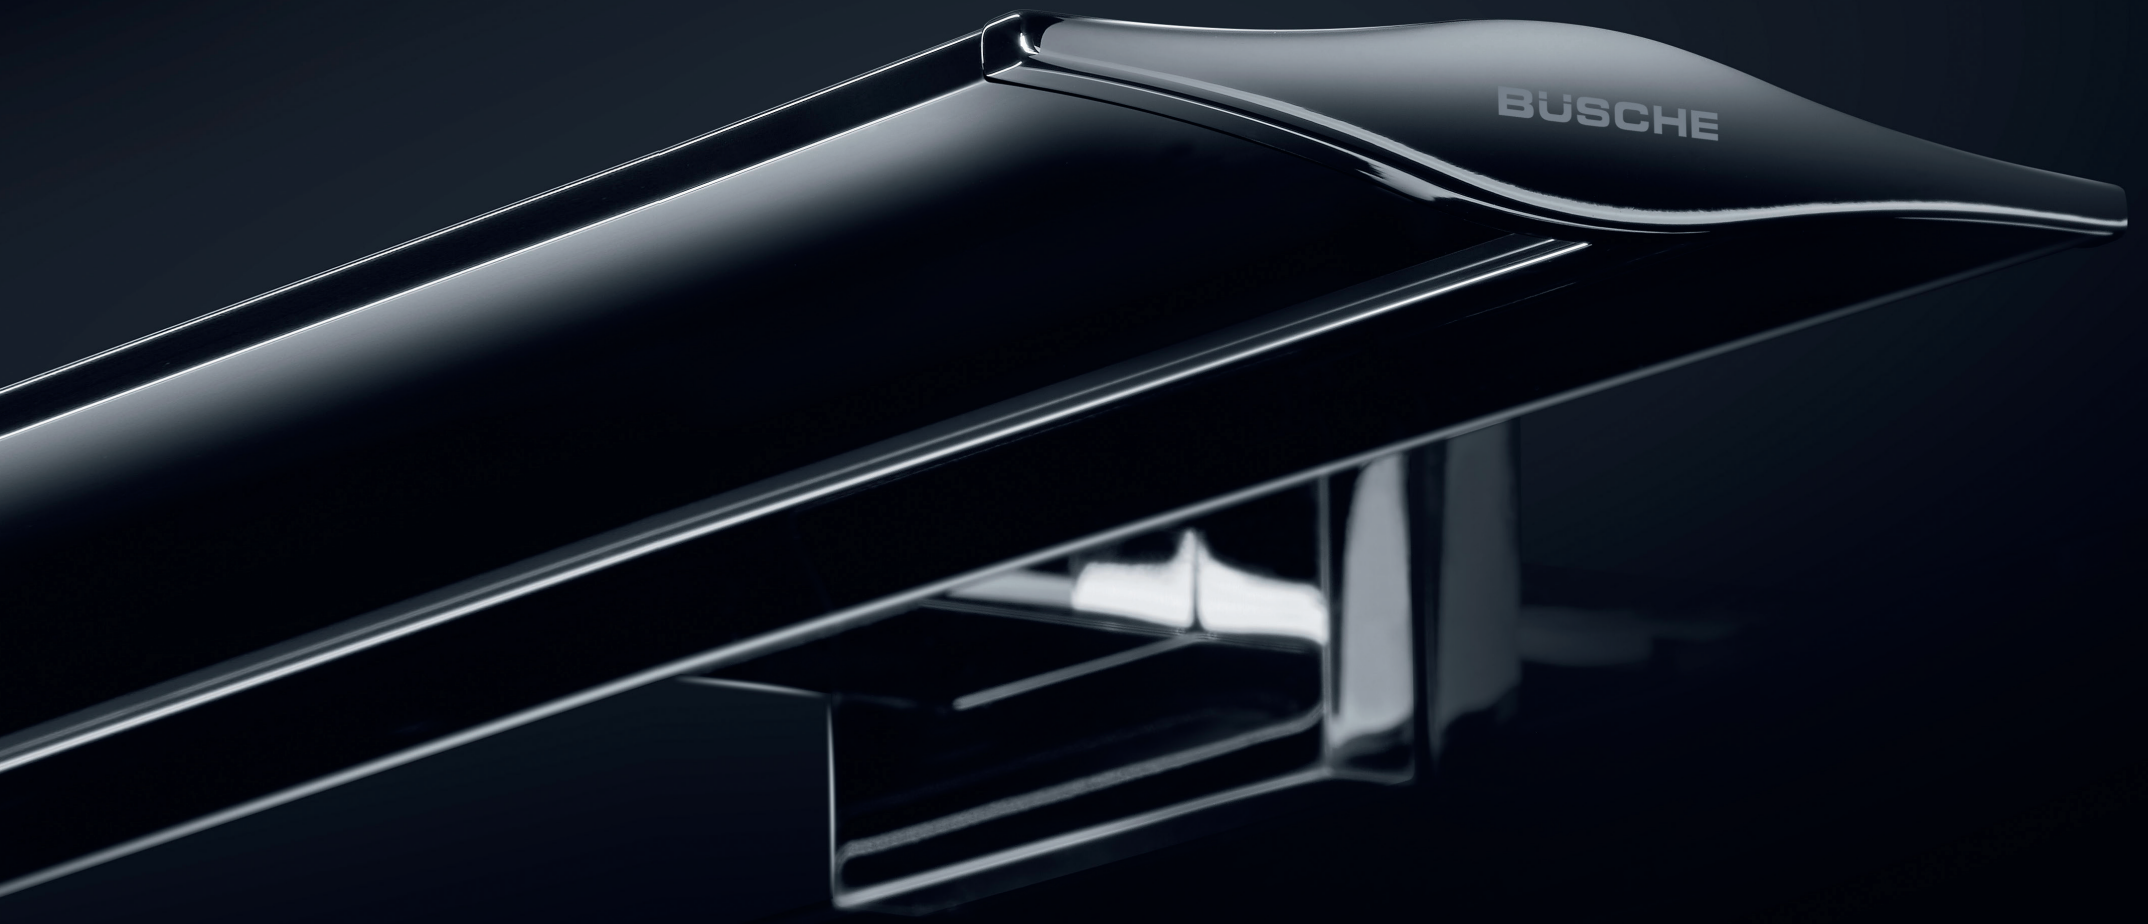

Our completely redesigned Configurator 2.0 guides you intuitively and securely through the entire process – from classic curtain rods and cord-operated systems to motorized solutions. It **helps you** find, configure, and order the right products – **automatically including all necessary components**. You can save your favorites, print non-binding quotes directly from the system, and make the whole planning process smoother than ever. Back in 1999, we launched our very first configurator – one of the first in the industry – with the goal of making working with BÜSCHE as easy and efficient as possible.

Try the new Configurator 2.0 with a guest login on our website – or request your personal customer login today!

SPECIAL SOLUTIONS

Notches / Bendings

NOTCHES a free of charge service

The following information is required:

- Standard notching - 20 mm distance from the end of the profile
- Specification of the distance from the profile end in mm required for non-standard notches
- Side indication of the notch required
- Can be done inhouse; special pliers (item no. 8080-00) required

BENDINGS Price on request

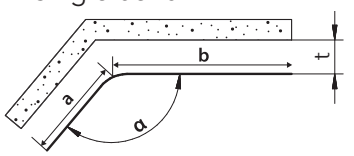

The following information is required:

- Set length a, b and c
- Set angle α and β
- Wall distance t

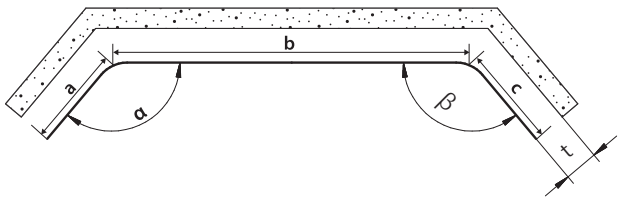

Note:

Dimensional tolerances of +/- 15 mm and +/- 2° possible
Complicated bends are only possible with a 1:1 template as a top view

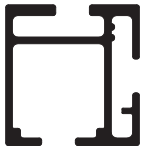

Single bend

Double bend

WITH CORDED SETS ON THE SAFE SIDE

As specialists in privacy screens, you and we are expected by our end customers to provide a compliant design in terms of child safety. As this is of paramount importance, the previous legal situation has been expanded at EU level, turning the ‚may' regulation into a clear requirement that will be in effect from 2014.

SAFE INSTALLATION

Small children can become strangled in cord loops. Depending on the system, this danger should be eliminated either by a control loop with a tear-off system or by a fixation point on the wall. Loops with pull cords must be attached to the wall at a minimum height of 150 cm (see illustration) above the floor to prevent them from tearing.

RESPONSIBILITY

Our products are produced and labeled in accordance with applicable standards and laws. It is the responsibility of the installer to inform the end user of any risks and to ensure proper measurement and installation. Please send us the completed form signed by the end user (your customer) confirming that you have instructed the end user in the operation of the installed Corded Set and have explained the requirements for child savty installation and operation of the system.

WARNING

Small children can become strangled in the loops of cords, chains, tapes, pull cords, and cords used to operate window coverings.

Cords should be kept out of the reach of children to prevent strangulation and entanglement. They can also wrap around the neck. Beds, cribs, and furniture should be placed away from window treatment cords. Do not tie cords together.

Make sure the cords do not twist and form a loop.

Warning in accordance with DIN EN 13120

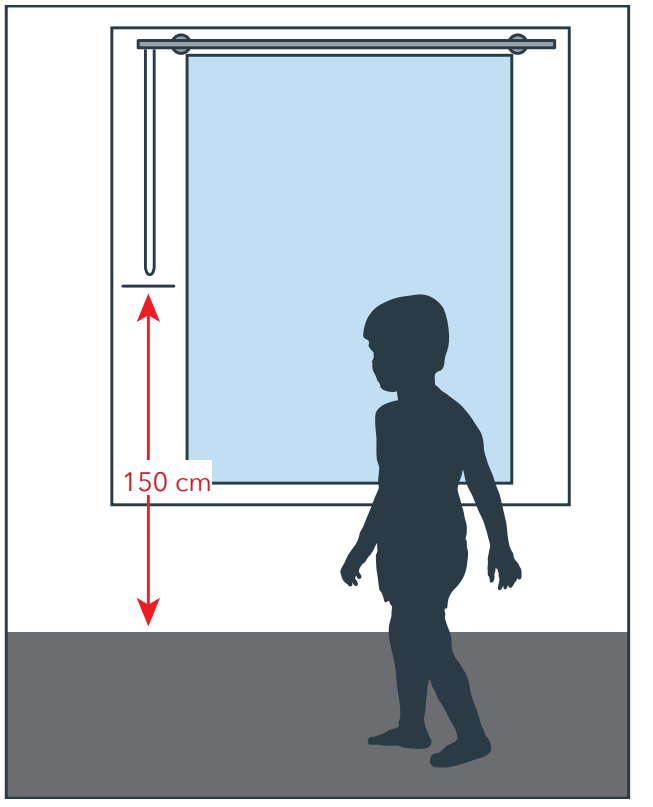

Illustration: Corded set

Additional information on child safety can be found on the website of ViS, the Association for Interior Window and Sun Protection

INFORMATION

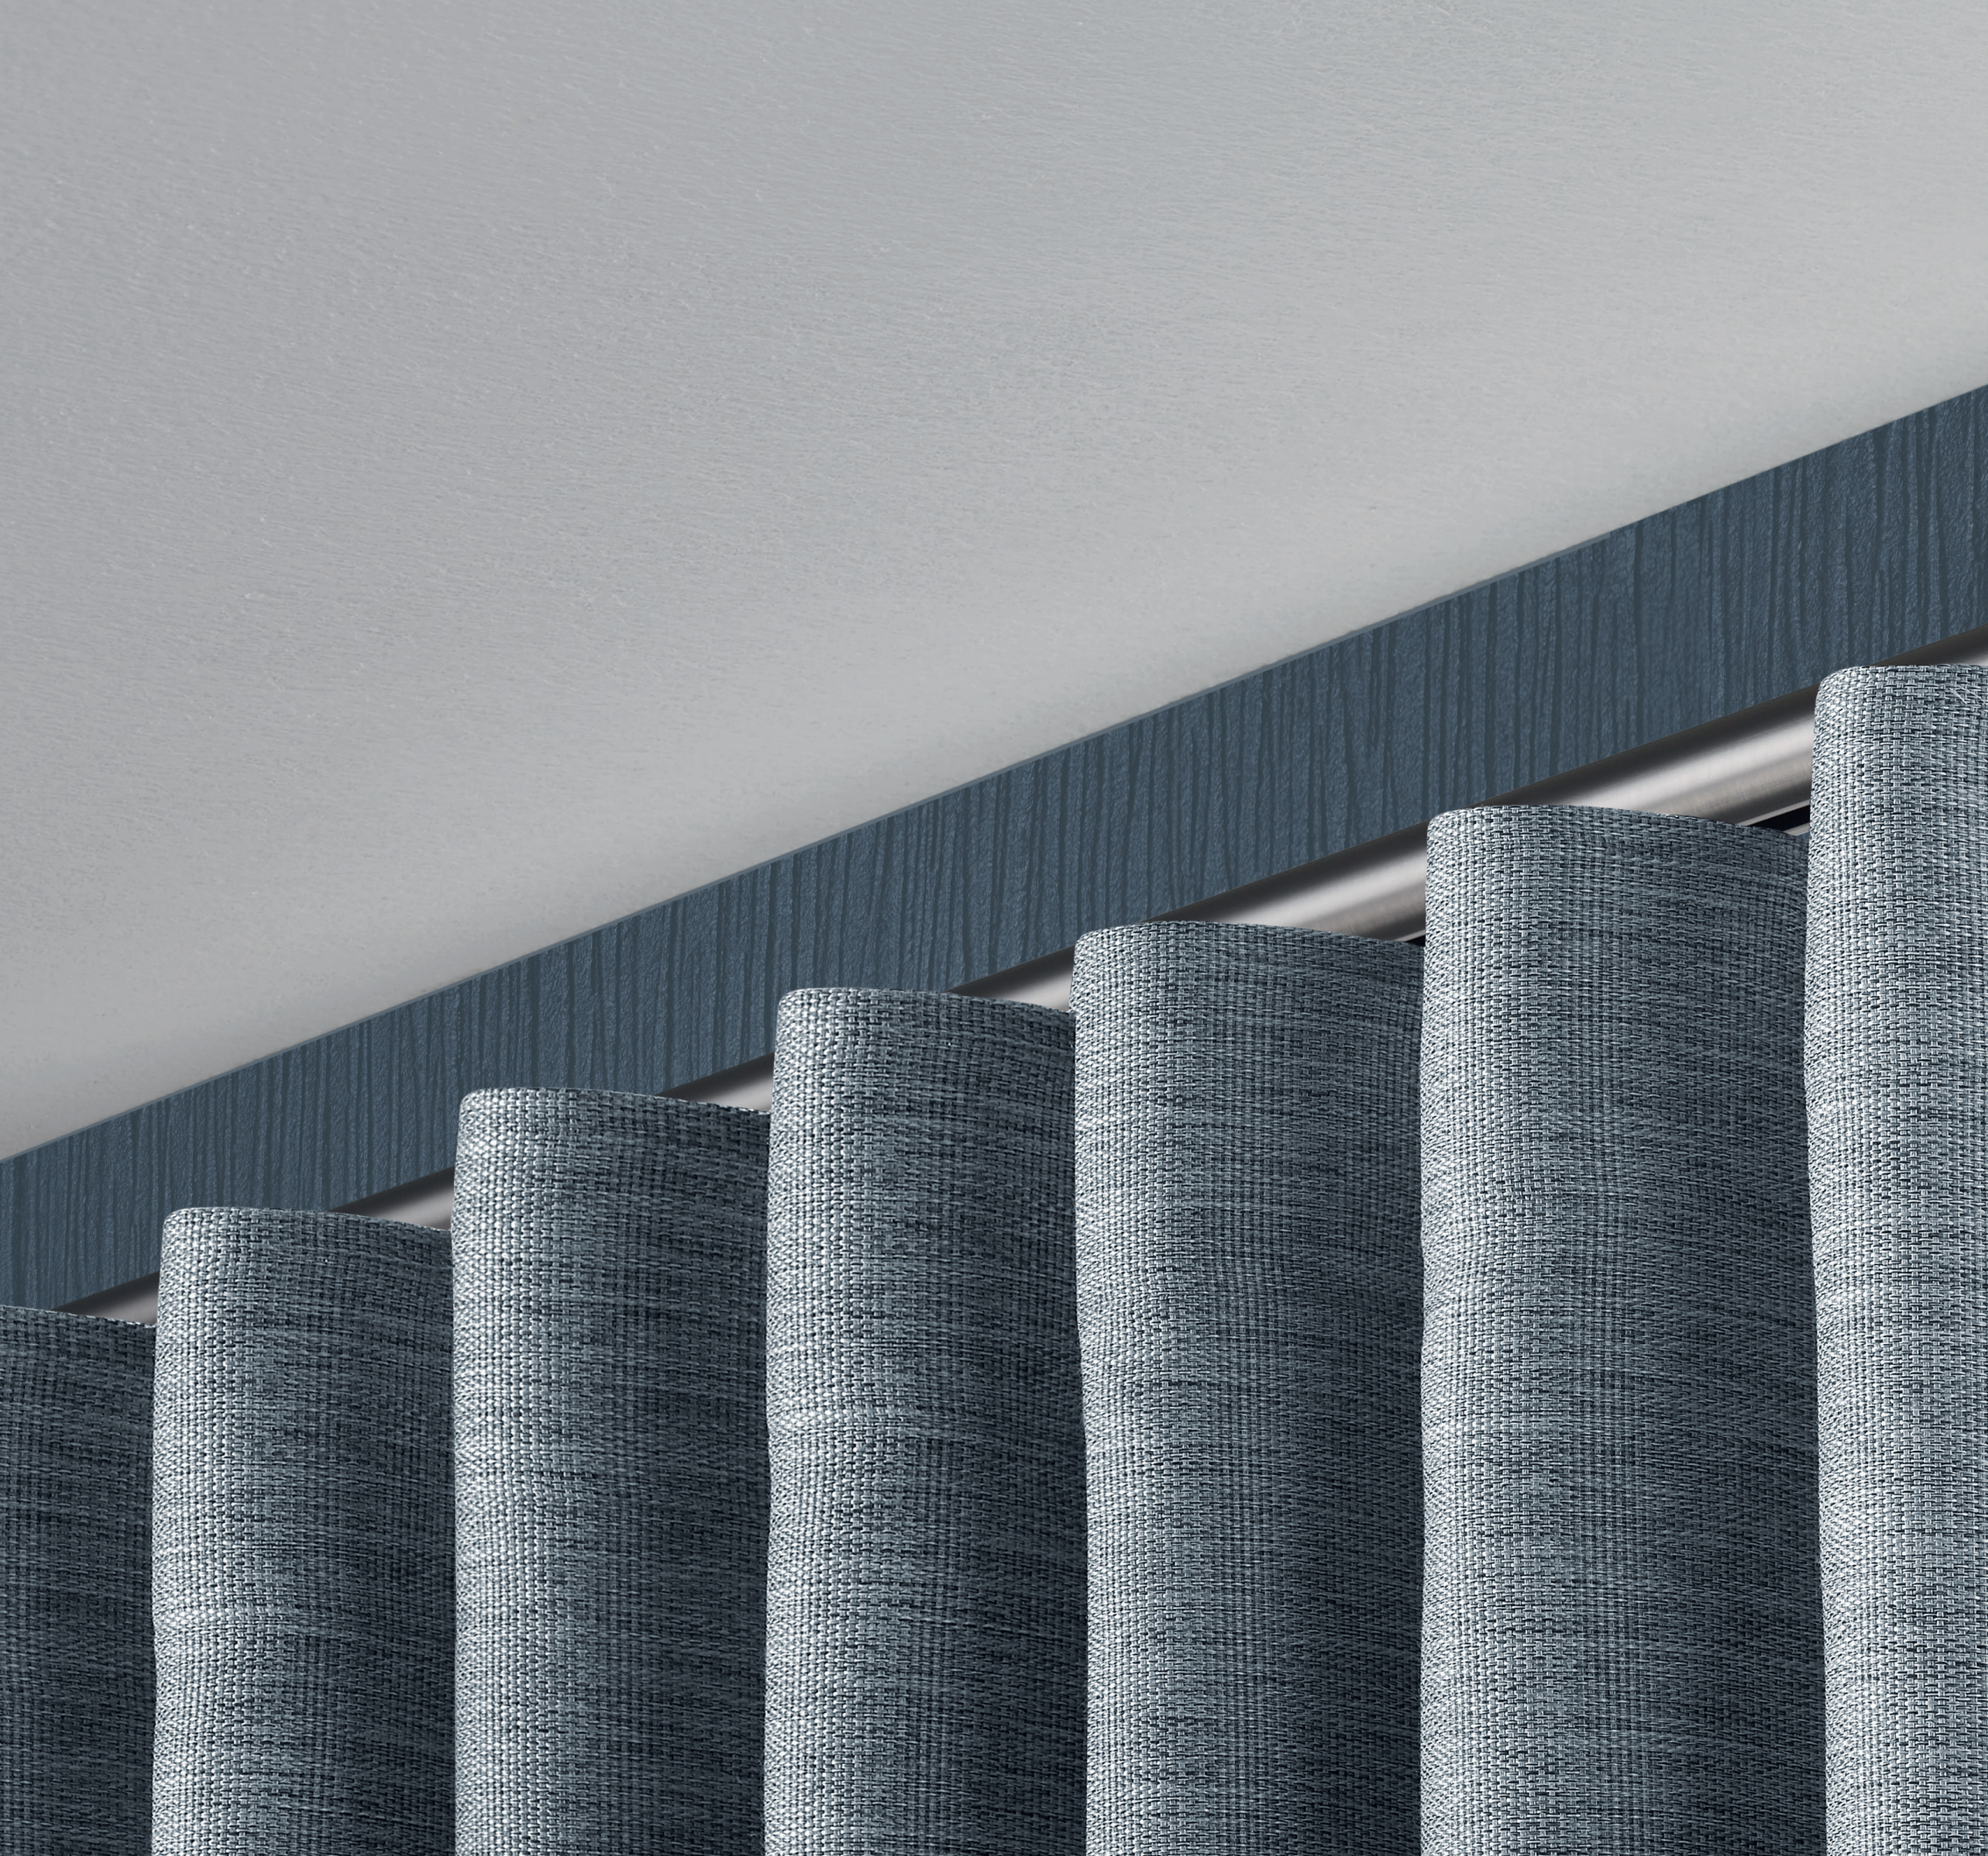

FOR ORDERS AND DELIVERIES

1. The current terms and conditions of sale and delivery of H. Büsche GmbH & Co. KG apply.
2. All prices are recommended retail prices in EUR, including VAT per set, piece, pair or meter.
3. The ordered dimension (= tube/profile length) is always supplied in cm. In case of intermediate dimensions, the next higher dimension according to the price list will be charged.
4. All measurements are approximate values in millimeters, centimeters or meters.
5. For orders below €100 net order value and/or package lengths from 260 cm onwards, H. Büsche GmbH & Co. KG reserves the right to apply an additional surcharge.
6. For neutral or direct shipments to third parties, a surcharge of 25% will be applied to the total order value.
7. The majority of brass and aluminum products are coated with a special protection lacquer. This protection lacquer is burnt at a temperature of approx. 140 degrees in order to permanently protect the high-quality products. Please avoid using chemical cleaning products in any case, as these could attack and damage the protection lacquer.
8. In rooms with high humidity, brass products with a chrome/nickel-plated finish or aluminum products with an anodized finish should preferably be used due to their higher corrosion resistance.
9. Please note that minor colour variations in finishes may occur due to material differences between production batches. We kindly ask for your understanding that such variations do not constitute grounds for replacement. In addition, any surface deviations that are no longer visible after installation on the window (from a viewing distance of approximately 1 meter) are not considered defects and therefore do not qualify for complaint.
10. The use of an additional bracket for complete curtain sets has been determined in cooperation with our customers and is a non-binding recommendation. Under certain conditions, the use of additional brackets should be considered and implemented for shorter tube/profile lengths:

    - Use of Heavy Curtain Fabrics
    - Fabric packs not hanging directly under a bracket
    - Brackets with larger wall distances
    - Multiple-Channel brackets / double brackets / combo-brackets / multi-brackets

    In addition, the weight of the entire decoration must be checked and taken into account when using in high rooms and with large fabrics. Warranty is excluded.
11. No liability is accepted for damage caused by incorrect installation.
12. All ceiling / wall brackets are supplied with high quality branded multi-function dowels „Made in Germany“. Before installation, the conditions on site should be checked and the use of special dowels should be verified. Correct installation is the responsibility of a qualified and trained installer.
13. Order confirmations oblige the buyer to immediately check the correctness and completeness of the order specifications. In the case of incorrect deliveries, no claims for compensation will be accepted.
14. It is expressly pointed out that all delivered goods must be checked for completeness and correctness upon receipt and before further shipment or processing. Direct delivery to third parties does not exempt from the obligation to inspect incoming goods. Complaints must be made immediately and in written form, at the latest within one week after receipt of the goods.
15. Return of goods must always be agreed with an authorized person of the H. Büsche GmbH & Co.KG before return shipment. In the event of an accepted return, only original packaged and undamaged goods will be taken back. Tubes, profiles, rods and custom-made products cut to size are excluded from return. All returns which are not the fault of H. Büsche GmbH & Co. KG will only be taken back subject to a minimum 40% restocking fee. Products that were delivered more than 12 months ago will not be taken back.
16. H. Büsche GmbH & Co. KG reserves the right to deviate from illustrations, descriptions, dimensions, technical changes, further developments, improvements and the correction of any printing errors and mistakes at any time.
17. H. Büsche GmbH & Co. KG expressly reserves the right to make price adjustments at any time in the event of increases in labor and material prices that have not been taken into account.
18. For Forest, Motion Blinds/Coulisse and Somfy brand products, H. Büsche GmbH & Co. KG assumes no liability / warranty, the general terms and conditions and warranty regulations of the manufacturers Forest (www.forestgroup.nl), Motion Blinds/Coulisse (www.motionblinds.com/coulisse.com) and Somfy (www.somfy.com) apply.
19. By placing an order, the buyer expressly accepts the above-mentioned information for orders and deliveries of the H. Büsche GmbH & Co.KG.
20. The general terms and conditions of the H. Büsche GmbH & Co. KG can be found at www.buesche.de.

TAPE

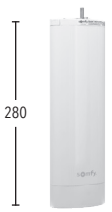

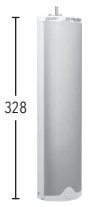

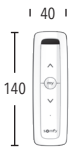

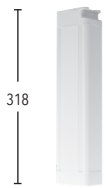

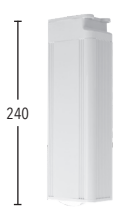

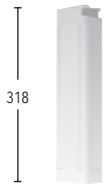

The principle:

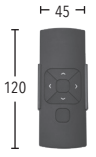

The LaOla Wave chain consists of plastic gliders connected by a thin nylon cord 8 cm apart.
Centered in an internal profile channel, the gliders form even waves toward the front and back.

Complete width (with wave)	Gliders	Loop sequence	approx. 1 : 1,7 Overhang: 5,5 cm	Gliders	Loop sequence	approx. 1 : 2 Overhang: 8 cm	Gliders	Loop sequence	approx. 1 : 2,25 Overhang: 8 cm
